

**Advanced Solutions for Container Inspection,
Liquid Nitrogen & CO₂, Packaging and Process**

CSS

CUSTOM SALES & SYSTEMS

Custom Sales & Systems goal is to provide industry leading, cost-effective and reliable Quality Control and Inspection solutions that satisfy the requirements of our customers. These solutions represent our commitment to deliver the most advanced and innovative technology available today, but maintaining and meeting our customer's needs and requirements.

Our company is integrated by a highly trained professional team to provide you with the most advanced technology, engineering analysis, installation assistance and the most effective technical and spare parts support that can be offered.

We provide automated solutions for many Processes, Quality Control, and Packaging applications. Our technologies are manufactured by industry leaders with decades of experience based out of North America and Europe. Our products are specifically designed to offer high-tech solutions that perfectly fit our customer's needs in the Beverage, Food, Pharmaceutical, Personal Care, and Chemical Industries.

VACUUM BARRIER VBC CORPORATION

Vacuum Barrier's complete line of liquid nitrogen injection systems and cryogenic piping remain the world leaders in the industry. VBC provides the most advanced and efficient piping systems for all applications and the most precise dosing systems for either O₂ control or generating internal pressure in aluminum cans or flexible containers such as PET bottles at high production speeds. The VBC liquid nitrogen injection system NITRODOSE[®] accurately delivers controlled amounts of liquid nitrogen for pressurization or inerting of containers at speeds up to 2000 BPM.

* Product only for Latin America

Teledyne TapTone systems are the most cost-effective and high-accuracy inspection systems in the industry and inspect 100% of the production for seal integrity and the detection of leaks in containers. The systems inspect for vacuum, pressure, fill level and cap/foil presence in aluminum and metal cans, glass and plastic bottles, plastic cups, jars, flexible pouches and other containers, all in a fraction of a second, rejecting defective products before they are shipped to your final consumer. The TapTone systems give you the greatest flexibility for multiple patented sensors at a single point on the production line that work under harsh environments.

* Product only for Latin America

The **Air Sentry system** is the INTELLIGENT way to air dry containers for the food, dairy, beer and beverage industries. It is essential to have an Air Blow-Off System to remove excess water caused by rinsing or condensation and the Air Sentry systems replace the traditional compressed air with a compact, INTELLIGENT and low energy consumption solution to blow off water or particles from your containers or surfaces.

The Air Sentry system can dry off the code area or the complete container before the label application or multi-packing, dry off returnable bottles before being inspected by the empty bottle inspector or blow-off ionized air to remove dust, particles and static from empty containers.

* Product for USA and Latin America

Sure Purity manufactures the innovative CARBOGUARD multi-barrier polishing filters for the CO₂ used in the beverage industry.

The CARBOGUARD is designed with a molecular adsorption technology to retain impurities by creating a permanent bond between the impurity and the filter media.

The Sure Purity systems are manufactured under ISO 9001:2015 guidelines and comply with the USA's Code of Federal Regulations. The CARBOGUARD has been approved by the leading beverage brands worldwide based on their advanced technology and first-class Customer Service.

* Product only for Mexico, Colombia, Peru and Ecuador

The **SleeveTec** automatic shrinkable label applicators are designed with the maintenance free servomotor technology and do not require compressed air, providing the highest efficiency, accuracy and reliability for production speeds up to 500cpm. The main features of the SleeveTec steam and electric heat tunnels are their heavy-duty design and low energy consumption to provide you with the best performance to shrink labels and tamper evident bands on your round or non-round containers.

* Product for USA and Latin America

Unisensor is an innovative engineering company that offers worldwide patented inspection systems based on optoelectronics and spectrographic technologies. These systems are the best solutions for the analysis of gases and the detection of contaminants in returnable beverage containers, PET recycling and CO₂ gas.

The AQUASCREEN and the UNISPECTRE inspection systems provide the most efficient and reliable solution to detect the smallest traces of contaminants in refillable PET and polycarbonate containers.

The CARBOSCAN provides the most accurate in-line analysis of CO₂ gas and CO₂ certification for the beverage industry for gas suppliers and bottlers around the world.

* Products only for Latin America (not including Brazil)

TRI-TRONICS® , Inc. designs and manufactures high quality and advanced performance photoelectric sensors and fiber optic light guides since 1954.

Their products include encoders and electronic controls that are designed with the highest accuracy, long life and patented technologies.

The Tri-Tronics photocells are the preferred sensors in the packaging industry for bottling, inspection, packaging, inkjet and laser coding applications.

* Product only for Latin America

CUSTOM SALES & SYSTEMS

LOOKING FOR SPECIAL PROCESS, PACKAGING OR INSPECTION APPLICATIONS?

CONTACT US TO BETTER SERVE YOU.

CUSTOM SALES & SYSTEMS, INC.

260 Scarlet Blvd. | Oldsmar, Florida 34677 USA
Tel: +1.813.855.1400 | Email: sales@css-fl.com

CUSTOM SALES & SYSTEMS, S.A. DE C.V.

Av. Ignacio Comonfort 202 | Santa Ana Tlapaltitlán | Toluca, México. 50160
Tel: +52.722.773.2929 | Email Servicio: servicio@css-fl.com | Email Ventas: ventas@css-fl.com

CUSTOM SALES AND SYSTEMS, S.A.C.

Jr. Simón Salguero 1060 - 2 | Santiago de Surco, Lima – Perú
